

Magic Mirror

Nicholas Solinsky, a senior at Handley High School, built a new mirror exhibit for the Shenandoah Discovery Museum as his Eagle Scout project. The exhibit tests your mind as your eye and brain try to tell the difference between a retinal image of the reflected spring and the actual spring. Can you touch the spring or is just an illusion? The 17-year-old son of Kim and Ed Solinsky, Nick is a member of Troop 45, which meets at the Knights of Columbus. He has been a Boy Scout for seven years.
